Freelance Front End/Full Stack Developer, New York, NY   **December 2020 - Present**

Using JavaScript, HTML, CSS to create different projects for clients.

See portfolio for more details codingbythomas.com.

Front End Developer, Chingu; Remote   **July 2021 - October 2021**

Problem: Provide users an experience to create their own store online.

Solutions: Users were able to visit our website to build their own website using HTML conversion technology. The final project allowed users to create their own websites with their own designs using our own technology. Unfortunately due to time constraints we were not able to finish the store functionality.

Full Stack Developer Intern, Fox News; New York, NY   **October 2019 - December 2020**

Problem: Being able to view historical election data of 2012 and 2016 to compare with 2020 election data per each state.
Solution: Used data visualization technologies to view election data for users of Fox News.

Other Work Experience

Teleprompter Operator, Fox News; New York, NY   **June 2017 - Present**

Running the Teleprompter for live news shows. Training and operating robotic cameras, video levels, and Viz for live news shows.

Certification

AWS Certified Developer - Associate   **November 2020 - November 2023**
AWS Certified Cloud Practitioner   **July 2020 - July 2023**
